A Bodie Bear Story.

From The Free Press A few days ago a teamster, who had in charge an eighteen-mule team and a heavy load of freight, was delayed veveral hours in his progress by a grizzly.
He had hauled the heavy wagon to the top of the hill and left the "back action" at the foot. It being about dinner time, he left his team and returned to the foot of the hill to take lunch, and to the foot of the hill to take lunch, and was seated on the load enjoying a frugal repast, when there appeared at the rear of the wagon a huge grizzly. The animal saw the teamster on top and walked about surveying the scene. The man on top had no firearms, and was in a moment confident that he was in a state of siege. To get off his load and run was fully, so he sat and surveyed his enemy. Thu bear seemed to enjoy the situation, and was not at veyed his enemy. The bear seemed to enjoy the situation, and was not at all worried. Occasionally he would sit on his haunches and look at the teamster, and then content himself by picking up the pieces of lunch thrown to him. In the meantime the teamto him. In the meantime the team-ster grew nervous, fearing that it was a "gone game" with him. His wife and children in Carson were thought of, and the trip to Bodie seemed dubi-ous. The snimal remained there about two hours, and concluding that the wooded hills. The teamster made for the wagen on the hill, and the few gray hairs that are now seen distribut-ed among his rayen locks are calculaamong his raven locks are attributed to his interview with bruin.

Revenge is Sweet.

Lem Offutt shot his father-in-law, about vengeance, refused to appear in court as a complainant, and it was generally supposed that he forgave the assailant. But Lem kept care-fully away from him. This spring Evans was able to ride out in an easy wagon; and it was observed that he always had a cocked pistol lying in found at last. Castor oil his lap, and closely scanned every man who came in sight. He was looking for Lem, and on meeting him atable Castor Oil is equal in the road, he sent a ball directly in medicinai activity to the through his heart.

FOR PRESIDENT,

JAMES A. GARFIELD.

OF OHIO

FOR VICE PRESIDENT,

CHESTER A. ARTHUR, OF NEW PORK.

AN ANTI-TILDEN CONVENTION.

A press dispatch from New York to-day indicates that Tilden has little chance of the nomination at Chicago. Of the 738 delegates composing the Convention 694 have already been elected. His total strength to-day, according to the most favorable estimates, is only 93, and the combined votes of delegates who have declared for other candidates, and of those who are so far uncommitted, is 254. As a two-thirds vote is necessary to secure the pomination, it is evident that Tilden's prospects are not bright. Seymour's prospects seem to be the best at present.

#### EDITORIAL NOTES.

An Immense Cattle Range.

Speaking of large stock ranches, the Inter-Ocean remarks that the late John Iliff held a range over 150 miles long, extending from Greely east to Julea-burg and from the Platte many miles to the south. Of this tract he had purchased 20,000 acres. His chief rendezvous, forty miles from Julesburg, was a small village of houses, sheds and corrals, with ample facilities for branding and handling cattle. He

#### A TERRIBLE CATASTROPHE.

A New York-dispatch gives the following account of a frightful accident which occurred on the Sound last Friday night, as related by a passenger on the Stonington:

The man who stole the painting of the "Nymphs and Satyrs" from a Virginia studio a year ago, has been arrested in Carson. He will be taken to Virginia for trial.

Soon after the steamer left Proviin a moment there was terrible confusion. Men, women and children, in all stages of undress, rushed frantically from their berths to the upper deck for a few moments. Everybody thought the boat was sinking and there was a struggle for the life preservers. The officers of the boat said the boat was larking forward, but there was no Wood at \$18 per cord, was leaking forward, but there was no danger. It was then seen that the steamer into which the Stonington had run was the Narragansett. The latter had been struck amidship, and two or three minutes after the collision

flames burst out and immediately en-veloped the entire vessel. The scene was frightful. The shricks and cries of the passengers on the Narragansett were distinctly audible on the Stonington. The passengers could be seen leaping into the water and rushing frantically in all directions. The boats of the Stopington were lowered after a delay of several minutes, and by that time the Narragansett had settled and was sinking. By some blunder the plugs in the life-boats were left out, and the boats filled with water. This caused additional delay. The men in the boats did not know how to row them. At last they reached the scene of the wreck and picked up a number of persons floating in life-preservers, mattresses, chairs, tables, planks, etc. The scene was appalling at this juncture. The City of New York came up and lay off at some distance. She lowered her boats and picked up as many of the drowning passengers as she could find. When all hope of further rescue was abandoned the

According to the San Diego News, the fishermen of Roseville, on that bay, are much elated by the report of the discovery of fine codfish near an island to the southward some 200 miles. Some Chinese fishermen found them in deep water. Parties will go down soon and interview the spot where they are caught, and it is hoped that valuable fisheries may be developed.

Says the Yuba City Journal: A party of women and children from Los Angeles, en route for Washington Territory, camped in this place last Monday evening. They had two wagons, tents and everything complete for a long overland trip. The train was under the sole management of a woman, who will pilot and run the whole shebang until they are at their ourney's end.

The City Under Martial Law and Great Riot Imminent

Special to the GAZETTE

SAN FRANCISCO, June 14 .- Leadville is under martial law declared by Governor Pitkin. All places of business were closed on Saturday. The drilling of the citizens' forces is active. Cavalry and infantry one thousand strong charged up and down the street several times, but could not keep them clear. The mob offered no resistance but talked loudly. Vesterday Governor Pitkin issued a proclamation appointing officers to command the town. The Sheriff also issued a proclamation demanding that all persons interfering with the working of mines desist und er peril. It is supposed that martial law was declared because the Mayor and Council are in sympathy with the striking miners, and that the move was made to take the direction of affairs out of their hands. Feeling is intense, and trouble may begin at any moment.

Divers at Work on the Sunken Steam STONINGTON, June 14 .- A large number of persons have visited the scene of the Narragansett disaster. The investigation of divers shows that the upper hurricane deck and its staterooms were entirely gone, while the cabins and staterooms on the main deck were a charred and indistinguishable mass. A large quantity of freight has been raised.

Tilden's Declining Boom.

New York, June 14 .- Thirty-six of thirty-eight states have chosen delegates to the Cincinnati Convention, or 694 out of 738 delegates composing the Convention. As none of them are absolutely instructed for any candidate, it is impossible to make a calculation of the strength of the various aspirants which will be more than approximately accurate. Enough is known of the preferences of the delegates, however, to make it apparent that the Convention will be strongly against Tilden. Giving him the New York delegates solid, and the votes of all the other delegates which he has even a prospect of securing, and his total votes to-day are only ninetythree, while the combined vote of all his rivals and the delegates uncommitted, is 254. Hancock has 39 votes, and Bayard 50, Thurman 32, Field 33, - The GAZETTE force feeds on fish Seymour 29, Hendricks 17, and there are 54 votes uncommitted.

McFarlin says that he was away from home at the time of the biting, that his wife was all alone on the place and the dog was simply attending to his own business in biting anybody that approached the house. The trial will probably be interesting. Mr. Jamison will probably be called upon to produce the bite in court.

The Democratic Nomination. The Board met to-day, pursuant to adjournment. Present: Hymers, Kin-\$1,000, was ressonable, whereupon their report was received, and it was ordered that Wm. Anderson be allowed the sum of \$1,000 out of the general fund less one-half of the expenses incurred

in appraising the road.

In relation to the Commercial Row sewer, the report of the committee was received and laid over for further action. Several bills were presented and allowed. Board adjourned to meet July 5, 1880.

The Reform Club Meeting.

The Reform Club meeting on Sat urday evening was not largely attended. The programme was much shorter than usual, but what was presented in the way of music and elocution was good. John Bowman's address on temperance reform was practical and to the point. He showed by figures what an immense sum of mo is squandered in foolish drinking an insisted upon the necessity of a re-form. Mr. Bowman was, at the close of his address, asked to sign the pledge. He did not sign, but said: "Do not as I do but as I say." In the absence of John F. Alexander, who was down on the programme for a lec-ture, D. Banks McKenzie was called upon to address the meeting. He responded with a brief speech on temperance," speaking with his usual

Subterranean Fishery.

W M Anderson sent to the Ga-ZEITE office yesterday three of the fish found in the springs at his place east of Honey lake. They are a sort of chub but of a different species from those found in the river. They are of all sizes from two to thirteen inches in length and come apparently out of the clefts in the rock through which the water bubbles up. They are small when they first annear and grow small when they first appear and grow so large that they cannot get away. There is no stream above ground where they can be found and no one has ever seen any in Honey lake or anywhere in that country. The spring at Mr. Anderson's is six feet deep, twenty wide and eighty long. The water is warm and is the best of washing water. It probably contains soda in some form. The question is where do the fish come from?

A Mysterious Female Pedestrian.

Says the Winnemucca Silver State The railroad boys say that a woman is tramping it across the Continent, and is as independent as a hog is said to be on ice. She has been on the Humbolt Division for a week past and was at Iron Point at noon yesterday. This evening she will probably arrive here. She carries a bundle in which she has clothing and provisions, and asks no favors of anybody. At night she cooks her meals, and tramp it along the road during the day, making on an average from 25 to 30 miles a day. Near Carlin one of the train a day. Near Carlin one of the train men told her that perhaps she could get a pass if she asked Superintendent Coddington for it. She replied that she wanted none, and when she desired to ride she would purchase a ticket. What object she has in spending series the Couling months transing across the Couling nent no one along the road has been able to ascertain, as she seems determined not to be interviewed.

Death of Miss Emma Crocker.

Last evening news was received here of the death of Miss Emma Crocker at San Francisco yesterday morning. She had been in delicate health for years. Last summer, by the advice of her doctor, she went to the Bay, and since, excepting at the time of her brother's death, had not once returned to Reno. Her condition became critical some weeks age and her sister went from here to be with her. The intelligence of Miss Emma's sudden death was received here with sorrow by everybody who knew her, as she was a general favo-rite among her acquaintances. Grand Indian Pow Wow.

The Washoe Indians are holding a State Convention on the south side of the river near the hospital. Capt. Jim says the object is to get the Government to give the Washoes some assistance. A delegate will be sent to Washington to urge the claims of the Washoes upon the Government. They argue that as they are more friendly to the whites than any other tribe, they should have the most help from the power which dispenses grub and blankets. (This is where the Washoes are entirely wrong. The tribes which murder the most white women and children are those that the Gov ernment is most "paternal" with. If the Washoes want help from Washington, they should proclaim war im-

mediately.) There are about 300 Indians attending the Convention. Feasting and dancing attend the grand pow-wow. There will be a big dance to-night by the light of the moon.

A Reno Man in Arizona. H. B. Maxson writes from Tucson Arizona, that he expects to remain there three months longer, when he will return to Reno and settle up his business here with a view to permanent residence in Arizona. He says the Indians are very hostile, but he will take his chances, as the country is good for his business. The letter concludes as follows:

Mr. Hammersley arrived in Rend yesterday. He drove in from Goose lake to take out some machinery for a awmill on Pine creek. Lumber is worth \$12 per thousand there. the interests of the Sierra Valley
Ditch Company. The intention of
the company is to resume work on
the ditch if these gentlemen report
that it is advisable to do so.

The started home with
two feather pillows as he told him to
buy. She looked around in the wagon
where he said they were and found
the pillows, a five-dollar greenback
and some silver lying in the bottom of
the wagon. The other pillows were
nowhere. She thinks Frank must
have drank some "Oh, be joyful" before he started. MISCELLANEOUS.
